

NUT

A projector which, in addition to advanced lighting performance, uses the language of forms to play a leading role in street furniture.

A new outdoor projector, which immediately reveals important and original design elements. Going beyond the minimalism of certain types of design - oriented to the mere function of the luminaire, as a neutral container of light - Nut rediscovers the pleasure that originates from seeing an object with beautiful, smooth and harmonious lines and an essential shape. Inspired by organic design, Nut, like a nutshell, is defined by the sinuous curves of its body. Its harmonious and proportionate structure suggests a natural and balanced dimension of artificial light in the constructed environment: the effect is reassuring, elegant and relaxing. Nut is indicated for illuminating large outdoor areas, building facades and streets, as it can be installed on the ground, on the wall and on a pole.

NUT

DESIGN - STEFANO DALL'OSSO

Technical specifications

The Nut outdoor projector is extremely flexible in its applications.

It is provided by Quattrobi in two different sizes (height: 415 and 615 mm), for specific installations and uses. It is equipped with a range of accessories for wall, ground and pole mounting, with solutions that allow to install multiple overlaying lighting elements.

The projector is entirely made of die-cast aluminium and is fitted with a front louver in high-resistance tempered glass.

The reflector is made of super-pure oxidized and polished aluminium, with spot, superspot, medium, flood, road, symmetrical and asymmetrical optical components. Gaskets are of silicone material and screws of stainless steel.

□ II insulation class guarantees maximum safety.

The hot-galvanised and coated steel poles, to be mounted on the ground or with fixing plate, are available in three different heights (4000 - 6000 - 9000 mm) and are provided with cable inlet slot, earthing connection, electrical equipment slot. The projector uses metal halide discharge lamps and is supplied with a PF-corrected electromechanical ballast. With UV stabilised epoxy-polyester coat finish, Nut is available in grey and anthracite standard colours. Thanks to the materials used and to the special structural solutions, the luminaires of the Nut line are weatherproof and can be installed even in severe environmental settings.

Road optical components according to Rule CEI EN 13201
Lane width 5 m – Lamp power 70W
Distance between poles 27 m – Lamp mounting height 6.4 m
I/H ratio = 4.2

Optical components and light sources

Different types of optical components are available for Nut: spot, superspot, medium, flood, road, symmetrical and asymmetrical. The light sources used by the projector are metal halide discharge lamps (70W, 150W and 250W - G12; 60W - 140W - PGZ12; 70W - 150W - Rx7s; 250W - Fc2).

DISCHARGE LAMPS

	MT (CDM-T) - G12	70W
	MT (CDM-T) - G12	150W
	MT (CDM-T) - G12	250W
	MD (CDM-TD) - RX7s	70W
	MD (CDM-TD) - RX7s	150W
	MD - Fc2	250W
	PGZ12	60W
	PGZ12	140W

Accessories

The luminaire is equipped with a range of accessories for wall and pole mounting, as well as with wall-washer louvers and anti-glare shields, directional louvers, anti-vandalism protection grid.

Bike lane optical components according to Rule CEI EN 13201
Lane width 3 m – Lamp power 70W
Distance between poles 21 m – Lamp mounting height 4.3 m
I/H ratio = 4.9

Structural features

Installation: floor, wall and pole

Luminaire housing: die-cast aluminium

Louver: tempered glass

Reflector: super-pure oxidised and polished aluminium

Optical components: spot, superspot, medium, flood, road, symmetrical and asymmetrical

Light sources: metal-halide discharge lamps

Accessories: base and wall/pole fixing supports, wall-washer shields, anti-glare shields, directional louvers, anti-vandalism protection grid

Standard finishing: grey, anthracite

Protection class: IP65

Insulation class: II ☐

Power supply: 230V -50Hz

Adjustable projector for metal halide discharge lamps.
Complete with power-factor-corrected electromechanical ballast
Front louver in tempered glass.
