

KYKLOS

SI È ADAGIATO NEL POLIURETANO ESPANSO UN NUOVO CORPO ORBITANTE NELLE VARIANTI SOSPENSIONE E APPLIQUE, ENTRAMBE DISPONIBILI IN DUE MISURE. KYKLOS È ANELLO SPESSO DUE CENTIMETRI CHE PROIETTA LUCE VERSO L'ALTO E SI TRASFORMA IN UNA FONTE A DOPPIA EMISSIONE, PER UNA SAPIENTE DIFFUSIONE DELLA LUCE. GRAZIE ALLA TECNOLOGIA DI ALIMENTAZIONE DIRECT-TO-THE-POWER, L'INTENSITÀ DELLA LUCE PUÒ ESSERE REGOLATA CON UN SEMPLICE DIMMER.

design Linea Light Group, 2014
